Director

PARWAAZ FINANCIAL SERVICES LIMITED

NOTES TO THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED DECEMBER 31, 2024

CORPORATE AND GENERAL INFORMATION

1.1 Legal status and operations

Parwaaz Financial Services Limited ("the Company") was incorporated on December 23, 2020 under the Companies Act, 2017 as a company limited by shares. The Company obtained license to carry out investment finance services as a Non-banking Finance Company ("NBFC") under the Non-Banking Finance Companies (Establishment and Regulation) Rules, 2003 ("the NBFC Rules") and Non-Banking Finance Companies and Notified Entities Regulations, 2008 ("the NBFC Regulations") on June 22, 2021.

The objective of the Company is to provide financing primarily to Small and Medium Enterprises (SMEs) within Pakistan. The Company also intends to provide business development services to SMEs.

The registered office of the Company is 4th Floor 34 S, Main boulevard Gulberg 2, Lahore, Punjab.

The ultimate parent of the Company is Karandaaz Pakistan.

The Company has complied with insurance coverage requirement as required by NBFC Rules 2003. In accordance with Sub-section 09 of Section 07 (NBFC rules 2003), the company has obtained sufficient insurance coverage from an insurance company rated minimum A- by a credit rating agency registered with the Commission against any losses that may be incurred as a result of employee's fraud or gross negligence.

The Pakistan Credit Rating Agency Limited (PACRA) has assigned long-term rating of A+ (2023: nil) and short-term rating of A1 (2023: nil) to Parwaaz Financial Services Limited on September 26, 2024.

BASIS OF PREPARATION

2.1 Statement of compliance

These financial statements have been prepared in accordance with the accounting and reporting standards as applicable in Pakistan. The accounting and reporting standards applicable in Pakistan comprise of:

- International Financial Reporting Standards ('IFRS') issued by the International Accounting Standards Board (IASB) as notified under the Companies Act, 2017;
- Islamic Financial Accounting Standards (IFAS) issued by the Institute of Chartered Accountants of Pakistan as are notified under the Companies Act, 2017;
- The Non-Banking Finance Companies (Establishment and Regulation) Rules, 2003 and the Non-Banking Finance Companies and notified entities Regulations, 2008 (here-in-after mentioned as 'the NBFC rules and NBFC regulations');
- Directives issued by the Securities and Exchange Commission of Pakistan ("SECP"); and
- Provisions of directives issued under the Companies Act, 2017 along with part VIIIA of the repealed Companies Ordinance, 1984.

Where the requirements of the Companies Act, 2017, the NBFC rules and NBFC regulations and the directives issued by the SECP differ with the requirements of IFRSs, the requirements of the Companies Act, 2017, the NBFC Rules and NBFC Regulations, or the requirements of the said directives shall prevail.

2.2 Initial application of standards, amendments or an interpretation to existing standards

The following amendments to existing standards have been published that are applicable to the Company's financial statements covering annual periods, beginning on or after the following dates:

An

2.2.1 Standards, amendments and interpretations to approved accounting standards that are effective in current year

There are certain new and amended standards, issued by International Accounting Standards Board (IASB), interpretations and amendments that are mandatory for the Company's accounting periods beginning on or after January 1, 2024 but are considered not to be relevant or do not have any material effect on the Company's operations and therefore are not detailed in these financial statements except for the following:

(i) The Securities and Exchange Commission of Pakistan (SECP) issued SRO 1827(I)/2002 on September 29, 2022, notified that IFRS 9, Financial Instruments, will replace International Accounting Standard 39 (Financial Instruments: Recognition and Measurement) for reporting periods ending on or after June 30, 2024, with the option for earlier adoption. Accordingly, IFRS 9 has been adopted by the Company. IFRS 9 "Financial Instruments" addresses the classification, measurement and recognition of financial assets and financial liabilities and replaces the related guidance in IAS 39 "Financial Instruments: Recognition and Measurement" that relates to the recognition, classification and measurement of financial assets and financial liabilities, derecognition of financial instruments, impairment of financial assets and hedge accounting. It retains but simplifies the mixed measurement model and establishes three primary measurement categories for financial assets: amortised cost, Fair Value through Other Comprehensive Income (FVOCI) and Fair Value through Profit or Loss (FVTPL). The basis of classification depends on the entity's business model and the contractual cash flow characteristics of the financial asset. Investments in equity instruments are required to be measured at fair value through profit or loss with the irrevocable option at inception to present changes in fair value in OCI, without subsequent recycling to profit or loss.

The standard also includes an expected credit losses (ECL) model that replaces the current incurred loss impairment model. The ECL model involves a three-stage approach whereby financial assets move through the three stages as their credit quality changes. The stage dictates how an entity measures impairment losses and applies the effective interest rate method. A simplified approach is permitted for financial assets that do not have a significant financing component (e.g. trade receivables). On initial recognition, entities will record a loss equal to the 12-month ECL (or lifetime ECL for trade receivables), unless the assets are considered credit impaired. Under the predecessor standard, IAS 39, impairment losses on financial assets were recognized using an incurred loss model, which required evidence of a financial loss event before recognizing impairment.

For financial liabilities, there are no changes to classification and measurement except for the recognition of changes in own credit risk in other comprehensive income, for liabilities designated at fair value through profit or loss.

The adoption of IFRS 9 has resulted in change in accounting policies of the Company. The Company has elected to follow the modified retrospective approach for restatement i.e. comparative figures have not been restated on initial application. Any adjustments to the carrying amounts of financial assets and liabilities at the date of transition has been recognized in the opening retained earnings and other reserves at the beginning of the current period without restating the comparative figures.

| Assets | Balances as of December 31, 2023 (Audited) | Impact of Recognition of ECL | Taxation | Adjusted Balances as of January 01, 2024 |
|--|---|------------------------------------|------------------|---|
| | | | | |
| Long term financing - net | 350,893,259 | 251,876 | - | 351,145,135 |
| Short term financing - net | 1,048,040,000 | (8,236,560) | | 1,039,803,440 |
| Taxation - net | 12,232,410 | (1,143,701) | - | 11,088,709 |
| Liabilities Accrued and other liabilities Deferred Tax | 83,067,335 25,393,470 | (3,943,798) | - (2,315,558) | 79,123,537 23,077,912 |
| Equity | | | | |
| Revenue reserve: unappropriated profit | 201,740,807 | (2,869,029) | - | 198,871,778 |

AM

Furthermore, on January 1, 2024, the management assessed which business models apply to the financial instruments held by the Company and classified its financial instruments into the appropriate IFRS 9 categories as follows:

| Financial Assets / Liabilities | Carrying amount as of December 31, 2023 | amount as of amount as of December 31, January 01, | | Classification under IFRS - 09 | |
|--------------------------------------|--|--|------------------|--------------------------------------|--|
| | (Rupees) | (Rupees) | | | |
| Financial Assets | | | | | |
| Long term financing - net | 350,893,259 | 351,145,135 | Cost | Amortised Cost | |
| Financing on behalf of parent entity | 401,197,763 | 401,197,763 | Cost | Amortised Cost | |
| Long term deposits | 3,676,875 | 3,676,875 | Cost | Amortised Cost | |
| Advances, deposits, prepayments and | | | | | |
| other receivables | 46,374,828 | 46,374,828 | Cost | Amortised Cost | |
| Short term financing - net | 1,048,040,000 | 1,039,803,440 | Cost | Amortised Cost | |
| Short term investments | 1,645,344,496 | 1,645,344,496 | Held to Maturity | Amortised Cost | |
| Cash and bank balances | 234,196,887 | 234,196,887 | Cost | Amortised Cost | |

The amount of expected credit loss has been disclosed in note 30 to these financial statements.

Financial Liabilities

| Subordinated loan | 1,494,391,763 | 1,494,391,763 | Cost | Amortised Cost |
|-------------------------------|---------------|---------------|------|----------------|
| Short term borrowings | | * | Cost | Amortised Cost |
| Payable to parent entity | 432,744,449 | 432,744,449 | Cost | Amortised Cost |
| Accrued and other liabilities | 83,067,335 | 79,123,537 | Cost | Amortised Cost |
| Lease liability | 19,607,382 | 19,607,382 | Cost | Amortised Cost |

(ii) During the current year, ICAP has withdrawn Technical Release 27 'IAS 12, Income Taxes (Revised 2012)' and issued the 'IAS 12, Application Guidance on Accounting for Minimum Taxes and Final Taxes' (the Guidance). Accordingly, in accordance with the Guidance, the Company has changed its accounting policy to designate the amount calculated on taxable income using the notified tax rate as an income tax expense. Any excess over the amount designated as income tax, is then recognized as a 'Levy' under 'IAS 37, Provisions, Contingent Liabilities and Contingent Assets', which were previously being recognized as 'income tax'. However, no adjustment in this regard has been made in these financial statements for the year ended December 31, 2024, as there is no impact of the same.

2.2.2 Standards, amendments and interpretations to existing standards that are not yet effective and have not been early adopted by the Company

There are certain standards, amendments to the accounting standards and interpretations that are mandatory for the Company's accounting periods beginning on or after January 01, 2025 but are considered not to be relevant to the Company's operations and are, therefore, not detailed in these financial statements, except for the following:

(a) Amendment to IAS 21 - Lack of Exchangeability

These amendments were in response to concerns raised when an entity is impacted by the amendments when it has a transaction or an operation in a foreign currency that is not exchangeable into another currency at a measurement date for a specified purpose. A currency is exchangeable when there is an ability to obtain the other currency (with a normal administrative delay), and the transaction would take place through a market or exchange mechanism that creates enforceable rights and obligations.

Assessing exchangeability between two currencies requires an analysis of different factors; such as the time frame for the exchange, the ability to obtain the other currency, markets or exchange mechanisms, the purpose of obtaining the other currency, and the ability to obtain only limited amounts of the other currency.

When a currency is not exchangeable into another currency, the spot exchange rate needs to be estimated. The objective in estimating the spot exchange rate at a measurement date is to determine the rate at which an orderly exchange transaction would take place at that date between market participants under prevailing economic conditions.

AU

W

These amendments are not expected to have a material impact on the Company's financial statements when they become effective.

The new amendments are effective for annual reporting year beginning on or after January 1, 2025 where earlier application was also permitted.

(b) Amendment to IFRS 9 and IFRS 7 - Classification and Measurement of Financial Instruments

The amendments clarify the timing for recognizing and derecognizing certain financial assets and liabilities, introduce an exception for some financial liabilities settled via electronic cash transfers, provide additional guidance for assessing if a financial asset meets the Solely Payment of Principal and Interest ('SPPI') criterion, require new disclosures for instruments with cash flow changes linked to Environmental, Social and Governance ('ESG') targets, and update disclosures for equity instruments designated at FVOCI.

The Company is in the process of assessing the impact of this amendment on the Company's financial statements.

The above mentioned amendments are effective for accounting periods beginning on or after January 1, 2026.

(c) IFRS 18 Presentation and Disclosure in Financial Statements

The new standard on presentation and disclosure in financial statements, IFRS 18, focuses on updates to the statement of profit or loss. It introduces key concepts such as the structure of the statement of profit or loss, required disclosures for certain profit or loss performance measures reported outside the financial statements (management-defined performance measures), and enhanced principles on aggregation and disaggregation applicable to the primary financial statements and notes.

The Company is in the process of assessing the impact of this amendment on the Company's financial statements.

The above mentioned standard is effective for accounting periods beginning on or after January 1, 2027.

2.2.3 Exemption from applicability of certain standards

Amendment of IFRS 07, 'Financial Instruments'

The SECP has deferred the application of International Financial Reporting Standard (IFRS) 07, 'Financial Instruments: Disclosures' through SRO 411(1) / 2008 on such Non-Banking Finance Companies as are engaged in investment finance services, discounting services and housing finance services.

2.3 Basis of measurement and preparation

2.3.1 Accounting convention

These financial statements have been prepared under the historical cost convention except as otherwise stated.

3 Significant accounting judgments, estimates and assumptions

The Company's material accounting policies are stated in note 4. Not all of these significant accounting policies require management to make difficult, subjective or complex judgments or estimates. The following is intended to provide an understanding of the policies that management considers critical because of the complexity, judgment of estimation involved in their application and their impact on these financial statements.

Estimates and judgments are continually evaluated and are based on historical experience, including expectations of future events that are believed to be reasonable under the circumstances. These judgments involve assumptions or estimates in respect of future events and the actual results may differ from these estimates. The area involving a higher degree of judgment or complexity and where assumptions and estimates are significant to the financial statements are as follows:

- (i) Useful lives and residual values of property and equipment note 4.1.
- (ii) Use of discount rates and interpretation of lease terms note 4.3.
- (iii) Recognition of deferred tax assets/liabilities and estimation of income tax provision note 4.10
- (iv) Allowance for expected credit losses note 4.14.
- (v) Identification and initial measurement of compound financial instruments note 4.13.
- (vi) Classification and measurement of financial assets 4.11.2.

AU

MATERIAL ACCOUNTING POLICY INFORMATION

The material accounting policies adopted in the preparation of these financial statements are set out below. These policies have been consistently applied to all the years presented, unless otherwise stated.

4.1 Property and equipment

4.1.1 Owned

4

Recognition and measurement

Property and equipment is stated at cost less accumulated depreciation and accumulated impairment losses, if any.

Capital work in progress and advances for capital expenditures are transferred to the respective item of property and equipment when available for intended use.

Subsequent expenditure

Subsequent costs are included in the asset's carrying amount or recognized as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the items will flow to the Company and the cost of the item can be measured reliably. All other repair and maintenance costs are charged to statement of profit or loss during the period in which they are incurred.

Depreciation

Depreciation is calculated to charge the cost of items of property and equipment less their estimated residual values using the straight line method and is generally recognized in statement of profit or loss at rates given in note 5 to these financial statements. Capital work in progress is not depreciated.

Depreciation on additions to property and equipment is charged on pro-rata basis from the day in which property and equipment is acquired or capitalized while no depreciation is charged for the month in which property and equipment is disposed-off / derecognized.

Impairment

The Company reviews the residual values and useful lives of property and equipment on a regular basis. Any change in such estimates in future years might affect the carrying amounts of the respective items of property and equipment with a corresponding effect on the depreciation charge and impairment.

Disposal

An item of property and equipment is derecognized upon disposal or when no future economic benefits are expected from its use or disposal. The gain or loss on disposal or retirement of an asset represented by the difference between the sale proceeds and the carrying amount of the asset is recognized in the statement of profit or loss.

4.2 Intangible assets

Recognition and measurement

Intangible assets are carried at cost less accumulated amortization and impairment losses, if any. Costs associated with maintaining intangible assets, are recognized as an expense as and when incurred.

Subsequent expenditure

Subsequent expenditure is capitalized only when it increases the future economic benefits embodied in the specific asset to which it relates. All other expenditure, including expenditure on internally generated goodwill and brands (if any), is recognized in the profit or loss as incurred.

Amortization

Amortization is calculated using the straight-line method, to allocate the cost of the intangible assets over its estimated useful life. The Company charges amortization on additions from the date the asset becomes available for the intended use up to the date when it is derecognized. Intangible assets with indefinite useful lives are not amortized.

M

4.3 Lease liability and right of use of asset:

Leases are recognized as a right-of-use asset and a corresponding liability at the date at which a leased asset is available for use by the Company.

The lease payments are discounted using the interest rate implicit in the lease. If that rate cannot be readily determined, which is generally the case for leases of the Company, the lessee's incremental borrowing rate is used, being the rate that the individual lessee would have to pay to borrow the funds necessary to obtain an asset of similar value to the right of use asset in a similar economic environment with similar terms, security and conditions.

Lease payments include fixed payments, variable lease payment that are based on an index or a rate expected to be payable by the lessee under residual value guarantees, the exercise price of a purchase option if the lessee is reasonably certain to exercise that option, payments of penalties for terminating the lease, if the lease term lects the lessee exercising that option, less any lease incentives receivable. The extension and termination options are incorporated in determination of lease term only when the Company is reasonably certain to exercise these options.

The lease liability is subsequently measured at amortized cost using the effective interest rate method. It is remeasured when there is a change in future lease payments arising from a change in fixed lease payments or an index or rate, change in the Company's estimate of the amount expected to be payable under a residual value guarantee, or if the Company changes its assessment of whether it will exercise a purchase, extension or termination option. The corresponding adjustment is made to the carrying amount of the right of use asset, or is recorded in profit or loss if the carrying amount of right of use asset has been reduced to zero.

The right of use asset is initially measured based on the initial amount of the lease liability adjusted for any lease payments made at or before the commencement date, plus any initial direct costs incurred and an estimate of costs to dismantle and remove the underlying asset or to restore the underlying asset or the site on which it is located, less any lease incentive received. The right of use asset is depreciated on a straight line method over the lease term as this method most closely lects the expected pattern of consumption of future economic benefits. The right of use asset is reduced by impairment losses, if any, and adjusted for certain remeasurements of the lease liability.

4.4 Cash and cash equivalents

Cash and cash equivalents are carried in the statement of financial position at cost. For the purposes of the statement of cash flows, cash and cash equivalents consist of cash and bank balances, and other short term highly liquid investments with original maturities of three months or less which form an integral part of the Company's cash management.

4.5 Short term borrowings

Markup bearing borrowings are initially measured at cost being the fair value of consideration received, less attributable transaction cost. Subsequent to initial recognition, they are measured at cost less subsequent payments.

4.6 Revenue recognition and Finance Cost

(a) Revenue Recognition

Revenue comprises of the following:

Markup / income on financing

M

Markup income / return on financing is recognized on a time proportion basis using the contractual rates except the markup income / return on non-performing financing.

Income from investment

Markup / return on investments is recognized on time proportion basis using contractual rates. Where debt securities are purchased at premium or discount, the related premiums or discounts are amortized through the profit or loss over the remaining period of maturity of said investment. Gain or loss on sale of investment is accounted for in the period in which the sale occurs.

Income on bank deposits

Return on bank deposits are recognized on time proportionate basis.

Income on Diminishing Musharika Financing

Profit on Diminishing Musharika arrangements is recognised under the effective profit rate method based on the amount outstanding. Income recoverable on diminishing musharika arrangements is recognised on a receipt basis.

Management fee

Management fee from Parent entity is recognized in occordance with Agency agreement with Karandaaz Pakistan at the rate of 1% of the average portfolio.

(b) Finance Cost

Finance cost comprise of markup expense on subordinated loans, short term borrowings, bank charges and financial charges on lease liability. Finance cost (except on subordinated loan) is recognized in profit or loss using contractual rates. Finance cost on subordinated loan is recognized in profit or loss using effective markup method.

4.7 Short term investments

Investments classified as financial asset at amortized cost are recognized initially at fair value, plus attributable transaction costs. Subsequent to initial recognition, these are measured at amortized cost using the effective interest method.

4.8 Provisions

Provisions are recognized when the Company has a present legal or constructive obligation as a result of past events, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. Provisions are reviewed periodically and adjusted to reflect the current best estimates.

4.9 Contingencies and commitments

Contingent liability is disclosed when:

- There is a possible obligation that arises from past events and whose existence will be confirmed only by the occurrence or non occurrence of one or more uncertain future events not wholly within the control of the Company; or
- There is a present obligation that arises from past events but it is not probable that an outflow of resources embodying economic benefits will be required to settle the obligation or the amount of the obligation cannot be measured with sufficient reliability.

Accounting policy in respect of contingent taxation liabilities is further elaborated in note 4.10.

4.10 Taxation

Income tax

Income tax expense comprises current and deferred tax. Income tax is recognized in the statement of profit or loss except to the extent that it relates to items recognized directly in equity or other comprehensive income, in which case it is recognized in equity or other comprehensive income as the case may be.

Current

Provision of current tax is based on the taxable income for the year determined in accordance with the prevailing law for taxation of income. The charge for current tax is calculated using prevailing tax rates or tax rates expected to apply to profit for the year if enacted after taking into account tax credits, rebates and exemptions, if any. The charge for current tax also includes adjustments, where considered necessary, to provision for tax made in previous years arising from assessments framed during the year for such years. Where there is uncertainty in income tax accounting i.e. when it is not probable that the tax authorities will accept the treatment, the impact of the uncertainty is measured and accounted for using either the most likely amount or the expected value method, depending on which method better predicts the resolution of the uncertainty. Such judgements are reassessed whenever circumstances have changed or there is new information that affects the judgements. Where, at the assessment stage, the taxation authorities have adopted a different tax treatment and the Company considers that the most likely outcome will be in favor of the Company, the amounts are shown as contingent liabilities. In making a judgment and / or estimate relating to probability of outcome, the management considers laws, statutory rules, regulations and their interpretations. Where, based on management's estimate, a provision is required, the same is recorded in the financial statements.

Deferred

Deferred tax is accounted for using the liability method in respect of all temporary differences arising from differences between the carrying amount of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of the taxable profit. Deferred tax liabilities are generally recognized for all taxable temporary differences and deferred tax assets are recognized to the extent that it is probable that future taxable profits will be available against which the deductible temporary differences, unused tax losses and tax credits can be utilized.

Deferred tax assets and liabilities are calculated at the rates that are expected to apply to the period when the asset is realized or the liability is settled, based on the tax rates and tax laws that have been enacted or substantively enacted by the reporting date. Deferred tax is charged or credited to the statement of profit or loss, except in the case of items charged or credited to equity or other comprehensive income, in which case it is included in the statement of changes in equity or statement of other comprehensive income as the case may be.

4.11 Financial instruments

Financial assets and financial liabilities are recognized in the statement of financial position when the Company becomes a party to the contractual provisions of the instrument.

4.11.1 Initial Recognition

All financial assets and liabilities are initially measured at fair value. For financial assets classified at FVTPL, transaction costs are expensed immediately in profit or loss. For financial assets classified at amortized cost or FVOCI, transaction costs are included in the initial carrying amount.

4.11.2 Classification & Measurement

The Company classifies its financial assets, based on the business model for managing the financial assets and their contractual cash flow characteristics in the following measurement categories:

- at amortised cost,
- at fair value through profit or loss ("FVTPL") and;
- at fair value through other comprehensive income ("FVOCI")

Business model

The business model reflects how the Company manages the assets in order to generate cash flows, that is, whether the objective is solely to collect the contractual cash flows from the assets or is to collect both the contractual cash flows and cash flows arising from the sale of assets. If neither of these is applicable (e.g. financial assets are held for trading purposes), then the financial assets are classified as part of 'other' business model and measured at FVTPL.

The factors considered by the Company in determining the business model for a group of assets include:

- Past patterns of holding or selling similar financial assets,
- Performance evaluation metrics used by key management,
- Internal risk management strategies and,
- How returns on these assets are reported and monitored internally.

Sole Payments of Principal and Interest ("SPPI"):

Where the business model is to hold assets to collect contractual cash flows or to collect contractual cash flows and sell the underlying asset, the Company assesses whether the financial instruments' cash flows represent solely payments of principal and interest (the 'SPPI test'). 'Principal' is defined as the fair value of the financial asset oninitial recognition and 'Interest' is defined as consideration for the time value of money and for the credit risk associated with the principal amount outstanding during a particular period of time and for other basic lending risks and costs (e.g., liquidity risk and administrative costs), as well as interest margin.

In assessing whether the contractual cash flows are SPPI, the company considers the contractual terms of the instrument. This includes assessing whether the financial asset contains a contractual term that could change the timing or amount of contractual cash flows such that it would not meet this condition.

In making the assessment, the Company considers:

- contingent events that would change the amount and timing of cash flows;
- leverage features;
- prepayment and extension terms;
- terms that limit the Company's claim to cash flows from specified assets (e.g. non-recourse loans); and
- features that modify consideration of the time value of money (e.g. periodical reset of interest rates).

A prepayment feature aligns with SPPI if it mainly represents unpaid principal and profit.

Where the contractual terms introduce exposure to risk or volatility that are inconsistent with a basic lending arrangement, the related financial asset is classified and measured at FVTPL.

The classification requirements for debt and equity instruments are described below:

(i) Debt instruments

(a) Amortised cost

Financial assets that meet the following conditions are measured at amortised cost:

- -The financial asset is held within a business model whose objective is to hold financial assets in order to collect contractual cash flows; and
- -The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

(b) Fair value through other comprehensive income

Financial assets that meet the following conditions are subsequently measured at FVOCI:

- -The financial asset is held within a business model whose objective is achieved by both collecting contractual cash flows and selling the financial assets; and
- -The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

W

Au

(c) Fair value through profit or loss

Assets that do not meet the criteria for amortised cost or FVOCI are measured at FVTPL. A gain or loss on a debt investment that is subsequently measured at FVTPL is recognized in the statement of profit or loss and presented net within other operating income/expenses in the period in which it arises.

(ii) Equity instruments

Equity instruments are instruments that meet the definition of equity from the issuer's perspective and are instruments that do not contain a contractual obligation to pay and that evidence a residual interest in the issuer's net assets.

All equity investments are required to be measured in the statement of financial position at FVTPL, with gains and losses recognized in the profit or loss, except where an irrevocable election has been made at the time of initial recognition to measure the investment at FVOCI.

4.11.3 Subsequent measurement and gains and losses

| (i) Financial assets at amortised cost | These assets are subsequently measured at amortised cost using the effective interest rate method. Interest income from these financial assets is included in markup income using the effective interest rate method. Any gain or loss arising on derecognition, foreign exchange gains and losses and impairment is recognized directly in profit or loss and presented in other income/ expenses. Impairment losses are presented as separate line item in the statement of profit or loss. |
|--|---|
| (ii) Financial assets at FVOCI | Debt instruments are subsequently measured at fair value. Interest income is calculated using effective interest rate method. Movements in the carrying amount are taken through OCI except for recognition of impairment gains or losses, markup income and foreign exchange gains & losses on the instrument which are recognized in the statement of profit or loss. |
| | Equity investments are subsequently measured at fair value. Net gains and losses are recognized in other comprehensive income. |
| (iii) Financial assets at FVTPL | These assets are subsequently measured at fair value. Net gains and losses, including any interest or dividend income, are recognized in the statement of profit or loss. |

4.11.4 Reclassifications

The Company reclassifies financial assets when and only when its business model for managing those assets changes. The reclassification takes place from the start of the first reporting year following the change. Such changes are expected to be very infrequent and none occurred during the year.

4.11.5 Derecognition

The Company derecognizes a financial asset when the contractual rights to the cash flows from the financial asset expire, or it transfers the rights to receive the contractual cash flows in a transaction in which:

- -Substantially all of the risks and rewards of ownership of the financial asset are transferred.
- -The Company neither transfers nor retains substantially all of the risks and rewards of ownership and it does not retain control of the financial asset.

(a) Amortised cost

On derecognition, the cumulative gain or loss is recognized in the statement of profit or loss.

(b) Fair value through other comprehensive income

On derecognition, the cumulative gains or losses previously recognized in OCI are reclassified from equity to the statement of profit or loss and recognized in other income/expenses.

(c) Fair value through profit or loss

On derecognition, the cumulative gain or loss is recognized in the statement of profit or loss.

4.11.6 Write-offs

The gross carrying amount of a financial asset is written off when the Company has no reasonable expectations of recovering a financial asset in its entirety or a portion thereof. Against each customer's outstanding exposure which stands as impaired, the Company makes an assessment with respect to the timing and amount of write-off based on the expectation of recovery. However, financial assets that are written off remain subject to legal enforcement activities for recovery of amounts due.

4.11.7 Financing

Financing comprises of long term and short term facilities extended to Small and Medium Enterprises (SMEs) and non-SMEs. The Company's objective for financing facilities provided is to collect contractual cashflows and accordingly books income on straight-line basis. The Company classifies its outstanding exposure as performing, under-performing and non-performing loans. Financing is stated net of provision for performing, underperforming and non-performing financing, if any, determined as per the policy of the Company.

The classifications of performing, underperforming and non-preforming relates to ECL stage 1, stage 2 and stage 3 respectively. In case of a financial asset being classified in stage 3 ECL, the income on such outstanding exposure is calculated on net-basis using credit-impaired effective interest rate. The Company applies 95% provision on stage 3 ECL financial assets.

The classification of financing under the ECL model adopted by the Company is as follows:

Stage 1 - 12-month ECL (Performing)

Applies to performing financial assets with no significant increase in credit risk.

Stage 2 - Lifetime ECL (Underperforming)

Applies to financial assets with a significant increase in credit risk since initial recognition.

Stage 3 - Lifetime ECL (Non-performing)

Applies to financial assets that are credit-impaired.

For details on impairment of financial assets, refer to note 4.14.

Calculating interest income under IFRS 9

| | No objective evidence of impairment exists (Stage 1) | Objective evidence of impairment (Stage 2) | Credit adjusted approach (Stage 3) |
|--|--|--|---|
| Base on which interest income is calculated | Carrying amount of the asset at the beginning of the period before allowance for ECLs | beginning of the period before | Carrying value of the asset at the beginning of the period after allowance for ECLs |
| Interest rate to apply to base | Effective interest rate | Effective interest rate | Credit adjusted effective interest rate |

The effective interest rate is the rate that discounts the estimated future cash flows from the asset to the asset's Amortized Cost before any allowance for expected credit losses. The credit adjusted effective interest rate differs from the effective interest rate in that estimates of future cash flows includes an adjustment for expected credit losses.

AM

4.12 Financial liabilities

4.12.1 Initial Recognition

Financial liabilities are recognized at the time the Company becomes a party to the contractual provisions of the instrument. These are initially recognized at fair value less any directly attributable transaction cost.

4.12.2 Classification

The Company determines the classification of its financial liabilities at initial recognition. The classification of financial liabilities is as follows:

- At fair value through profit and loss ("FVTPL"), or
- At amortised cost.

A financial liability is classified as FVTPL if it is classified as held for trading or it is designated as such on initial recognition. Other financial liabilities are measured at amortised cost using the effective interest rate method.

4.12.3 Subsequent measurement and gains and losses

| (i) Financial liabilities at amortised costs | After initial recognition, financial liabilities which are interest bearing are subsequently measured at amortised cost using the effective interest rate method. Gain and losses are recognized in the statement of profit or loss. |
|--|--|
| (ii) Financial liabilities at FVTPL | Net gains and losses, including any interest expense, are recognized in the statement of profit or loss. |

4.12.4 Derecognition

The Company derecognizes a financial liability when its contractual obligations are discharged, cancelled or expire. The Company also derecognizes a financial liability when its terms are modified and the cash flows of the modified liability are substantially different, in which case a new financial liability based on the modified terms is recognized at fair value. Any gain or loss on derecognition of financial liabilities is taken to the statement of profit or loss.

4.13 Compound financial instruments

In accordance with requirements of IAS 32 'Financial Instruments: 'Presentation', the Company assess whether a financial instrument meets the definition of financial liability or equity and recognizing the financial instrument accordingly. If the financial instrument is a compound instrument, the Company recognizes each component separately with the equity component representing the residual amount after deducting the fair values of liabilities component from the consideration. Such equity component is recognized as 'Capital Reserve' and presented net of related deferred tax.

4.14 Impairment

The Company assesses on a forward-looking basis the expected credit losses ('ECL') associated with its debt and equity instrument assets carried at amortized cost and FVOCI. The Company recognizes a loss allowance for such losses at each reporting date. The measurement of ECL reflects:

- An unbiased and probability-weighted amount that is determined by evaluating a range of possible outcomes;
- The time value of money; and
- Reasonable and supportable information that is available without undue cost or effort at the reporting date about past events, current conditions and forecasts of future economic conditions.

An

Expected credit loss measurement

IFRS 9 outlines a 'three-stage' model for impairment based on changes in credit quality since initial recognition as summarized below:

- A financial instrument that is not credit-impaired on initial recognition is classified in 'Stage 1' and has its credit risk continuously monitored by the Company.
- If a significant increase in credit risk ('SICR') since initial recognition is identified, the financial instrument is moved to 'Stage 2' but is not yet deemed to be credit-impaired.
- If the financial instrument is credit-impaired, the financial instrument is then moved to 'Stage 3'.
- Financial instruments in Stage 1 have their ECL measured at an amount equal to the portion of lifetime expected credit losses that result from default events possible within the next 12 months. Instruments in Stages 2 or 3 have their ECL measured based on expected credit losses on a lifetime basis.
- A pervasive concept in measuring ECL in accordance with IFRS 9 is that it should consider forward-looking information.

The key judgments and assumptions adopted by the Company in addressing the requirements of the IFRS 9 are outlined below:

Significant increase in credit risk (SICR)

The Company considers a financial instrument to have experienced a significant increase in credit risk when one or more of the quantitative or qualitative criteria have been met including past due history, ageing, probability of default etc.

The assessment of SICR incorporates forward-looking information and is performed on a periodic basis at a portfolio level for loans to SMEs and non-SMEs. In relation to loans and advances, deposits and other receivables, cash and cash equivalents etc., the assessment is performed at the counterparty level and on a periodic basis. The criteria used to identify SICR are monitored and reviewed periodically for appropriateness by the Chief Risk Officer.

Measuring ECL - Explanation of inputs, assumptions and estimation techniques

The Expected Credit Loss (ECL) is measured on either a 12-month (12M) or Lifetime basis depending on whether a significant increase in credit risk has occurred since initial recognition or whether an asset is considered to be credit-impaired. Expected credit losses are the discounted product of the Probability of Default (PD), Exposure at Default (EAD), and Loss Given Default (LGD), defined as follows:

- The PD represents the likelihood of a borrower defaulting on its financial obligation (as per "Definition of default and credit-impaired"), either over the next 12 months (12M PD), or over the remaining lifetime (Lifetime PD) of the obligation.
- EAD is based on the amounts the Company expects to be owed at the time of default, over the next 12 months or over the remaining lifetime (Lifetime EAD). The expected amount to be drawn up is computed after adjustment of the appropriate credit factor.
- Loss Given Default (LGD) represents the Company's expectation of the extent of loss on a defaulted exposure. LGD
 varies by type of financial instrument, counterparty, type and seniority of claim and availability of collateral or other
 credit support. LGD is expressed as a percentage loss per unit of exposure at the time of default (EAD).

The ECL is determined by projecting the PD, LGD and EAD for each period and for each individual exposure or collective segment. In lieu of the peculiar nature of the Company's financial statements and the portfolio, data for calculating PD% either for specific obligors or industry at large is not available and due to the lack of publicly available information on defaults / loan loss data, current year point-in-time PDs have been sought from Standard & Poor's (S&P) Global Corporate Default Rates study for the year 2024. Forward looking PDs have been estimated through a multi-variate regression model utilizing Gross Provision Charge Ratio of top 15 banks of Pakistan as a dependent variable while the independent variables are GDP Growth Rate, and change in Consumer Price Index (CPI). The change in CPI also acts as a proxy for prevailing interest rates, due to which a separate independent variable of interest rates was excluded given presence of multi-collinearity. The thesis here is that a subdued GDP growth rate and high inflation (consequently leading to higher interest rates), results in higher provisioning charge, and portfolio infection rates on a relative basis.

M

The LGD estimates which have been used across the calculation are exhibited below:

35% for fleet backed exposures 45% for Stage 1 and Stage 2 exposures 95% for stage 3 exposures

In respect of debt exposure with instruments issued by entities which have a credit rating issued by one of the licensed credit rating agencies, the same credit rating (either of the entity, or of the instrument) are used to map an estimate for Probability of Default. In case of absence of credit rating, mapping with other available ratings along security is considered for assessment of PD%.

The assessment of SICR and the calculation of ECL both incorporate forward-looking information. The Company has identified the key economic variables impacting credit risk and expected credit losses for each portfolio / party.

The impact of ECL on financial assets except long term and short term financing is not material.

4.15 Employees' provident fund

The Company operates a contributory provident fund for those employees who have opted for this scheme. Equal contributions are made by the Company and employee to the fund. The Company intends to create a separate provident fund trust to manage the employees' provident fund.

4.16 Presentation and functional currency

These financial statements are prepared in Pak Rupees, which is the presentation as well as functional currency of the Company. Figures have been rounded off to the nearest rupee unless otherwise specified.

4.17 Foreign currency transactions and translations

Transactions in foreign currencies are translated in Pakistan rupees at the exchange rate prevailing on the date of transaction. Monetary assets and liabilities in foreign currencies are translated into Pakistan rupees at the rates of exchange approximating those prevalent at the reporting date. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translations of monetary assets and liabilities denominated in foreign currencies are recognized in the statement of profit or loss.

4.18 Short term leases

The Company's policy with respect to short term leases i.e. of a period less than 12 months is to recognize payments on a straight line basis as an expense in the statement of profit or loss.

4.19 Dividend and appropriation to reserves

Dividend and other appropriation to reserves are recognized in the financial statements in the period in which these are approved.

4.20 Share capital

Ordinary shares are classified as equity and recognized at their face value. Incremental costs directly attributable to the issue of new shares are shown in equity as a deduction, net of tax, if any.

| | | | | |

The lease obligation relates to a 5 year rental agreement (expiring on November 30, 2028) for the Company's head office. Rentals are payable in advance on annual basis, with an increment of 25% after 3 years from the initial date (December 01, 2023). The Company has recognized a right of use asset at the present value of the lease payments at the incremental borrowing rate of 22.69% and prepaid rental installment. The Company is reasonably certain that it will not exercise its option to terminate the agreement early.

| | | 30,766,262 | 79,303,368 | 110,069,630 |
| Number of persons | | 1 | 24 | 25 |

This includes communication and fuel reimbursements allowed to employees as per the Company's policy. 35.1

This includes remuneration of CFO charged by parent entity as human resource and operational support cost under 35.2 service level agreement that was charged during the prior year. However, no such amount was charged during the current year.

Capital management 36

The primary objective of the Company's capital management is to ensure that it maintains a strong credit rating and healthy capital ratios in order to support its business and maximize shareholders' value. The Company manages its capital structure and makes adjustments to it in the light of changes in economic conditions. Capital includes ordinary share capital and reserves.

The Company monitors capital using a gearing ratio, which is long term debt divided by total capital.

38.2 Measurement of fair values

A number of the Company's accounting policies and disclosures require the measurement of fair value, both for financial and non-financial assets and liabilities.

The Company has an established control framework with respect to the measurement of fair values. Management has overall responsibility for overseeing all significant fair value measurements, including Level 3 fair values.

Management regularly reviews significant unobservable inputs and valuation adjustments. If third party information, such as broker quotes or pricing services, is used to measure fair values, then the management assesses the evidence obtained from the third parties to support the conclusion that these valuations meet the requirements of the approved accounting standards as applicable in Pakistan, including the level in the fair value hierarchy in which the valuations should be classified.

When measuring the fair value of an asset or a liability, the Company uses market observable data as far as possible. Fair values are categorized into different levels in a fair value hierarchy based on the inputs used in the valuation techniques as follows:

- Quoted prices (unadjusted) in active markets for identical assets or liabilities (level 1).
- Inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices) (level 2).
- Inputs for the asset or liability that are not based on observable market data (that is, unobservable inputs) (level 3).

If the inputs used to measure the fair value of an asset or a liability might be categorized in different levels of the fair value hierarchy, then the fair value measurement is categorized in its entirety in the same level of the fair value hierarchy as the lowest level input that is significant to the entire measurement. The Company recognizes transfers between levels of the fair value hierarchy at the end of the reporting period during which the change has occurred.

There were no financial assets or financial liabilities measured at fair value as at December 31, 2024.

B FINANCIAL RISK MANAGEMENT

The Company has exposure to following risk from its use of financial instruments.

- Credit risk
- Market risk
- Liquidity risk

Risk management framework

Risk management is carried out by the Board of Directors (the Board). The Board provides principles for overall risk management, as well as policies covering specific areas such as interest rate risk, credit risk and investment of excess liquidity. All treasury related transactions are carried out within the parameters of these policies.

The Board oversees how management monitors compliance with the Company's risk management policies and procedures and reviews the adequacy of the risk management framework in relation to the risks faced by the Company.

38.3 Credit risk

Credit risk represents the risk that one party to a financial instrument will cause a financial loss for the other party by failing to discharge an obligation. Credit risk arises from components of financial statements as disclosed below:

i. Concentration of credit risk

The carrying amount of financial assets represents the maximum credit exposure. The maximum exposure to credit risk at the reporting date was as follows:

| | | 2024 | 2023 |
|---|------|----------------|---------------|
| | Note | (Rupees) | (Rupees) |
| Long term financing - net | 9 | 939,898,353 | 350,893,259 |
| Short term financing - net | 13 | 1,612,082,492 | 1,048,040,000 |
| Financing on behalf of parent entity | 10 | 922,443,090 | 401,197,763 |
| Long term deposits | 11 | 3,776,875 | 3,676,875 |
| Advances prepayments and other receivable | 12 | 10,975,095 | 6,485,538 |
| Markup accrued - receivable | 12 | 61,263,246 | 38,389,032 |
| Accrued interest on term deposit | | | |
| receipts (TDRs) and saving accounts | 12 | 9,566,367 | 1,500,258 |
| Short term investments- PIB | 14 | 1,527,685,174 | i e |
| Short term investments-Treasury Bills | 14 | 19,275,763,343 | 1,645,344,496 |
| Cash and bank balances | 16 | 253,559,533 | 234,196,887 |
| | | 24,617,013,568 | 3,729,724,108 |

ii- Impairment losses

Under the earlier approach, the Company created a general provision of 1.5% based on historical loss trends and management judgment and specific provision was created againt non-performing loans. However, IFRS 9 introduces a more risk-sensitive impairment methodology based on a three-stage ECL model, which classifies financial assets into the following categories:

Stage 1 - 12-month ECL: Applies to performing financial assets with no significant increase in credit risk.

Stage 2 - Lifetime ECL: Applies to under performing financial assets with a significant increase in credit risk since initial recognition.

Stage 3 - Lifetime ECL (Credit-Impaired): Applies to non performing financial assets that are credit-impaired.

The new ECL model incorporates historical data, current conditions, and forward-looking macroeconomic factors to estimate credit losses. This transition may result in higher or lower impairment provisions compared to the previous

The Company calculated ECL on the exposures of long term and short term financing.

| | 2024 | 2023 |
|-------------------------------|-------------|------------|
| | (Rupees) | (Rupees) |
| Opening balance | 43,303,552 | 9,459,889 |
| Impact of adoption of IFRS 9 | 7,984,684 | - |
| Opening balance - as restated | 51,288,236 | 9,459,889 |
| Charge for the year: | | SHIPS IF |
| Stage 1 & 2 | 46,962,187 | 11,843,663 |
| Stage 3 | 4,587,527 | 22,000,000 |
| | 51,549,714 | 33,843,663 |
| Closing balance | 102,837,950 | 43,303,552 |

The provision account in respect of financing are used to record impairment losses unless the Company is satisfied that no recovery of the amount owing is possible; at that point the amount considered irrevocable is written off against the financial asset directly.

Based on past experience, the management believes that except as already provided for in these financial statements, no further impairment is required to be recognized against any financial assets of the Company.

iii. Credit quality of financial assets

The credit quality of major financial assets that are not impaired can be assessed by reference to external credit ratings (if available) or to historical information about counterparty default rate:

An analysis of the credit quality of financial assets is as follows:

| • | | 2024 | 2023 |
|---|-----------|----------------|---------------|
| | | (Rupees) | (Rupees) |
| Short term investment - Pakistan Investment Bonds | | | |
| Allied Bank Limited | A1+/AAA | 1,527,685,174 | |

| Allied Bank Limited | A1+/AAA | 18,848,616,622 | - |
| | | 19,275,763,340 | 1,645,344,496 |
| | Ratings | | |
| Bank balances | | | |
| United Bank Limited | A1+ / AAA | 80,087,746 | 107,187,327 |
| Allied Bank Limited | A1+/AAA | 1,683,321 | - |
| Bank Alfalah Limited | A1+/AA+ | 650,276 | 595,447 |
| Habib Metropolitan Bank Limited | A1+/AA+ | 171,116,625 | 126,414,018 |
| | | 253,537,968 | 234,196,792 |

38.4 Market risk

Market risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices. The Company's current market risk exposure is limited to interest rate risk. The objective of market risk management is to manage and control market risk exposures within an acceptable range.

38.4.1 Foreign currency risk

The PKR is the functional currency of the Company and as a result currency exposures arise from transactions and balances in currencies other than PKR. The Company's potential foreign currency exposure comprise:

- Transactional exposure in respect of non functional currency monetary items; and
- Transactional exposure in respect of non functional currency expenditure and revenues.

Transactional exposure in respect of non functional currency monetary items

Monetary items, including financial assets and liabilities, denominated in currencies other than the functional currency of the Company are periodically restated to PKR equivalent, and the associated gain or loss is taken to the profit or loss. The foreign currency risk related to monetary items is managed as part of the risk management strategy.

Transactional exposure in respect of non functional currency expenditure and revenues

Certain operating and capital expenditure is incurred by the Company in currencies other than the functional currency. Certain sales revenue is earned in currencies other than the functional currency of the Company. These currency risks are managed as part of overall risk management strategy. The Company does not enter into forward exchange contracts.

There is no foreign currency risk on year end monetary balances.

38.4.2 Interest rate risk

The interest rate risk is the risk that the value of the financial instrument will fluctuate due to changes in the market interest rates. The Company has financing and subordinated loan in Pakistani Rupees at variable rates. The financing and subordinated loan has variable rate pricing that is dependent on the Karachi Inter Bank Offer Rate (KIBOR).

i. Exposure to markup rate risk

At the reporting date the markup rate profile of the Company's markup bearing financial instruments was as follows:

| | 2024 Effective rate % | 2023 Effective rate % | 2024 (Rupees) | (Rupees) |
|-----------------------------|--------------------------|--------------------------|------------------|--|
| Financial Assets | | | | |
| - Fixed rate instruments | | | | |
| Saving accounts | 8.69% to 20.57% | 7.50% - 20.73% | 253,537,968 | 234,196,792 |
| Treasury Bills | 11.89% to 21.95% | 15.1% to 22.5% | 19,275,763,343 | 1,645,344,496 |
| Pakistan Investment Bonds | 13.25% | nil | 1,527,685,174 | - |
| | | - | 21,056,986,485 | 1,879,541,288 |
| Variable rate instruments | | = | | |
| Short term financing | 13.14% to 32.00% | 18.50% to 26.91% | 1,612,082,494 | 1,048,040,000 |
| Long term financing | 14.18% to 25.99% | 19.00% - 27.28% | 939,898,353 | 350,893,259 |
| | | = | 2,551,980,847 | 1,398,933,259 |
| Financial Liabilities | | | | |
| - Fixed rate instruments | | | | |
| Lease liability | 22.69% | 22.69% | 19,111,329 | 18,907,382 |
| | | = | 19,111,329 | 18,907,382 |
| - Variable rate instruments | | | | |
| Subordinated loan | 14.13% - 19.99% | 15% - 20.91% | 1,484,412,177 | 1,494,391,763 |
| Short term borrowings | 11.25% - 11.50% | *** | 20,283,693,837 | e de la companya de l |
| | | _ | 21,768,106,014 | 1,494,391,763 |

ii. Fair value sensitivity analysis for fixed rate instruments

The Company does not account for any fixed rate financial assets and liabilities at fair value through profit or loss. Therefore a change in interest rates at the reporting date would not effect the statement of profit or loss.

iii. Cash flow sensitivity analysis for variable rate instruments

If interest rates on saving account, at the period end date, fluctuates by 1 % higher / lower with all other variables held constant, profit before taxation for the period would have been Rs. 2.54 million higher / lower, mainly as a result of higher / lower interest income on floating rate instruments.

38.4.3 Other market price risk

The primary goal of the Company's investment strategy is to maximize investment returns on surplus funds. The Company adopts a policy of ensuring to minimize its price risk by investing in securities having sound market performance.

Liquidity risk

marketable securities, prudent fund management practices and the ability to close out market positions due to dynamic nature of the business. The Company's approach to managing Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due. Prudent liquidity risk management implies maintaining sufficient cash and liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Company's reputation.

Exposure to liquidity risk

There were no defaults on loans payable during the year.

The maturity profile of the Company's financial liabilities based on the contractual amounts is as follows:

| | Carrying amount | Contractual cash flows | Maturity up to one year | Maturity after one year and up to five years | Maturity after five years |
|-------------------------------|-----------------|---------------------------|----------------------------|--|------------------------------|
| | | | (Rupees) | | |
| December 31, 2024 | | | | | |
| Accrued and other liabilities | 142,343,790 | 142,343,790 | 142,343,790 | E | t |
| Short term borrowings | 20,283,693,837 | 20,283,693,837 | 20,283,693,837 | .UE | 116 |

39 Statutory minimum capital requirement and management of capital

Capital requirements applicable to the Company are set and regulated by the Securities and Exchange Commission of Pakistan ("SECP"). These requirements are put in place to ensure sufficient solvency margins. The Company manages its capital requirements by assessing its capital structure against the required level on a regular basis at the reporting date, the minimum equity requirement as per the NBFC Regulations for the non deposit taking NBFC is Rs. 100 million (2023: 100 million). As at December 31, 2024, the Company's total equity is Rs.1,819 million (2023: Rs. 1769.12 million)
